

We wanted to reach out to you and thank you for the sponsorship from Gorge Tech Alliance. Thank you, as without your help through the years, we would not have a robotics team. One of our goals this year is to have no financial burden on students and parents. We do not want to become a team that expects its members to have money-or rely on their parents' money. That would make us exclusive, and it would prevent some people from joining our team. We want to be a robotics team that is always growing and welcoming new members. This donation from Gorge Tech Alliance helps us make this goal a reality. It is especially helpful this year as we have lost funding from our school engineering program.

Thanks so much, with your support we will be able to contribute to expanding STEM throughout the Gorge.

Sincerely,

AOS Annex Robotics Team
